From the Harbor Master

Avast Mateys,

Ok, so I'm kind of late putting out this newsletter, it's been a busy month. We did some extraordinary stuff this month. We had a couple great days at Brisco, and some of us went to race in South Carolina. The Fort Yargo event was cancelled so we had to add another day at the lake. Like someone had to twist our arms to do that. We had fun as usual, and I even played Official Race Harbor Master coordinator, for some sailboat races. Of course, then our FE fleet would not leave the buoys, just for the sail boaters, so then we engaged the course without mercy. We had

an incident with Doug's speed vee, which I'll get into later. In SC we raced with some pro's and learned a lot. Doug's Titan won 1st place.

Avast, every year at this fall season, Mother Nature has a way of signaling the end of our racing. She set out the dreaded pine straw as way of telling us to go home and build some more for next year. Us diehards however will try again this next month.

November 18 (Sat) 11:00 AM - 3:00 PM
Regular meeting at Briscoe Park. Might be a bit cool this day. Free Hot Chocolate & Coffee

Matt's Coast Guard Cutter and Civil war cannon

Official Timekeeper and the Racers

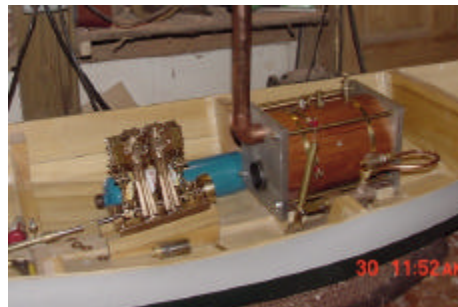

Tom's Harbor

ly's Rangley Ferry for comparison

The Smoke Stack

This is Tom Eagles' progress of the Rangley Ferry Steamboat. "Trinity E" Tom lives in Simpsonville, SC and comes to some of our events and meetings. Excellent work Tom. Can't wait for the maiden voyage. Contact Tom at: TomEagles44@aol.com

Scale: 2" = 1'
Plans: Garden Railway Aug/Oct 1997 Plan # 22 A & B
LOA: 65", Beam: 21" Electronic Water Level Detection System
Engine: Tiny Power (TP) Model 2V-10
Engine Pump: Tiny Power Model EP-2
Boiler: Horizontal propane fired
Hand Pump: Tiny Power Model HP-2
Propeller: 5"

South East Amp Hogs Doug's Den

Setting the water on fire is what it's all about. But try not to drive through the other guys boat. Sometimes that happens though when you play like we do. Matt took out my competition with his (Killer) Batgirl boat. We have renamed it to "Killer", since Doug also built it for Matt. And rumor has it, that Doug is now building a SpeedVee replacement, that is going to be called, "Doug's Revenge" mostly made of titanium and stainless.

Poor Doug, last time with the old friend

All that is left

Remember the good times. She will be missed.

And it never got a chance to run with my new speed vee

Mister Mister

This Mister Mister was a little bit different. He wanted the Titan29 bad, however, I don't think he wanted to drive it.

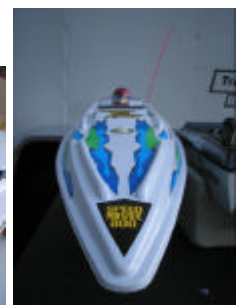

Oddities

What is it that Dave and Andrew have in common? Still wondering myself...

Phil's Corner

Phil is testing a new inexpensive brushless esc and motor from China in a cracker box. Results look promising and way over powered.

Ready, Set, Let's Go... Racing

*Congratulations
Doug on your 1st
Place win !*

Gas and Nitro Guys wondering where is the noise?

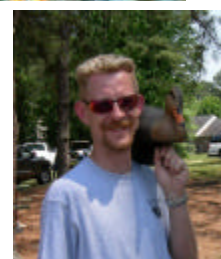

We're on the Web!

See us at:

<http://www.vac-u-boat.com/club.htm>

First time ever, FE class boats ran at the IMPBA SC Championships in district 13. Doug's "Titan29" won 1st place driven by Chris Harris. The gas and nitro guys welcomed us to the event and hopefully, next year, FE boats will continue to be invited into more IMPBA events.
