

Ray Posing

Ray's Harbor

We haven't had too many pictures of some scale models up close. Here is Ray's steamer and tugboat and Dave's Lobster boat. Can someone tell Dave and Ray that they don't have to stand in the water to run their boats?

South East Amp Hogs

Doug's Den

Setting the water on fire is what it's all about. Just ask Doug Smoke. Or anyone that is running a fast boat. Just please not when they are driving.

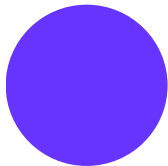

Mister Mister

We have to thank Matt this last month. He single handedly took care of most of all the mister misters. Obviously, he needed the attention. He brought out his submarine to the enjoyment of every mister mister within a 2mile radius. "Who's kid is that?"

*You know I
had to run
over it the
first time out.*

Cracker Cam and Phil's Corner

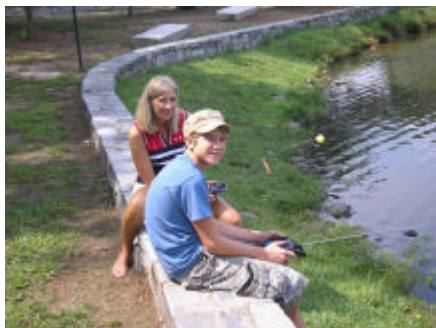

Phil has a way of coming up with new innovative ideas. Here he sports his new cracker cam, just to see what it would be like inside the boat. The video came out well. (Kind of scary.) He also came up with a new way to launch the racing buoys. By using another radio for the kneeboard and just pushing overboard the anchored buoys, the need for the tie off lines were eliminated. No more tangles.

*Screen shot from video of a duck getting in the way
with the Cracker Cam*

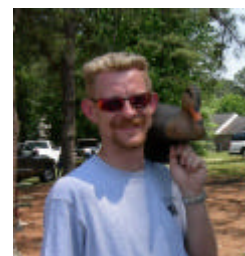

Here, Ducky, ducky, ducky.

More Pictures

Just wanted to say thanks
and see ya next month.
