South East Boat Modelers
Pirate Fleet

From the Harbor Master

Ahoy! This last month was the start of an exciting season for our club. We had a good turn out for the April club meeting and the weather was great. We had sailboats, scale boats, submarines and of course some very fast electrics. Even the tall ship had showed up and got some sailing time later in the evening. We did some racing, and generally had a great time. We had some fatalities to some of our course buoys from a couple rookie FE racers, which we will discuss later. Poke fun at. Whatever it takes. What are friends for? We are allotted a certain amount of trash talking. Aren't we?

Huh, Buoy Bashers ?

Anyways, this coming month's meeting is the SEBM Annual Swap meet. So, bring

some of your old stuff, so that you can sell, barter or trade. We have all bought boat stuff, which was a complete oops, because we didn't have the knowledge or resources and the hobby suppliers were just trying to make a buck. However, you can't blame them, they usually know less than you do on certain products. You are the authority and you have to tell them what you want. So, use the club members for information and follow up by Internet research before you buy. This swap meet may get you some great deals.

**Next Meeting is May19 Annual Swap Meet(Saturday) 11:00 AM - 3:00 PM
(Crackerbox Racing at 10:00 & 10:30 AM)
Diehards till dark. Info:**

Aaaaaaaarrrrrrrr,
Corsair Pirate Chris

April's Club Meeting

We had most all aspects of rc boats to show up this meeting.

Guys hanging out

Matt's submarine

Cracker box racing

Rick's table of boats.

Josh's Sailboat

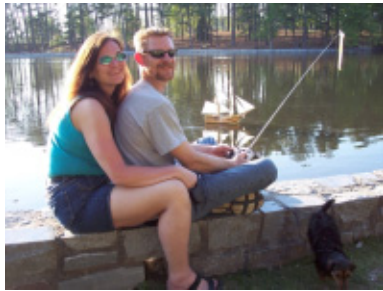

John's Harbor

Matt's new mini Tug

John Antonides Harbor Tug makes an impressive appearance on the water.

Cher shows me how to drive.

Chris's Harbor

Superman boat on 2S lipo batteries, a 6-cell N2 class. Hits the water flying. Then needing rescuing itself.

South East Amp Hogs

CSI Brisco

The CSI team was called upon after the club meeting. Unfortunately we had a perpetrator that did some inexpectable acts to our fine outstanding racing buoys. The suspects, who will remain unnamed, are currently at large. However, the CSI team retrieved the evidence, and has made positive identification of which boats caused the damage. Yes there were two. Which complicated matters. The rookie racers have been indited and are now officially called Buoy Basher.

Buoy Basher #1 suspect

CSI ----- proof positive match

Note: the other suspect has the same boat as the first. And is not pictured here on this page. Look at page 1.
